

*Cities and utilities: a key partnership to build  
water-wise cities*

Dear Member of DANVA,

With rapid urbanisation and scarce water resources, water professionals and urban planners need more than ever to share their knowledge to create sustainable water in cities, fostering synergies between water, energy, waste, food, and achieving liveability outcomes for the city.

We, DANVA, in collaboration with our co-hosts, are pleased to invite you to the **City-Utility Leaders Forum (CULF)** on 12 June, an event to share and be inspired on leveraging the partnership between utility leaders and city administrations to catalyze the transition to a circular economy for water-wise cities. We suggest that you extend this invitation to the chief planners or city leaders, so that you may attend this event together. Note that your city officials might already be aware of this event.

This Forum will be held during the Cities of the Future Conference, [Embrace the Water](#) in Gothenburg, Sweden, from 12-14 June, contributing to the celebration of Gothenburg 400 year's jubilee. This event as a whole is part of [the IWA Water-Wise Cities initiative](#), and based on the [Principles for Water-Wise Cities](#).

Attending this Forum will offer a unique opportunity to join the rest of the conference, built with an interactive programme on the benefits of collaboration across disciplines and scales. Through the Forum and conference sessions, you will engage with city and utility leaders as well as with water technical experts and urban planners, all on the journey to building a water-wise world.

Please RSVP by following this link: <https://goo.gl/forms/P9Ei8kEeKKy120gA2>

We hope to see you in Gothenburg!

If you have any further enquiries on this Forum, please contact Ms. Lisa Andrews from the IWA by email at [Lisa.Andrews@iwahq.org](mailto:Lisa.Andrews@iwahq.org)
